Personal Statement

I am a Microsoft Azure and Azure AI certified Full Stack Developer with a Master of Applied Computing and over five years of experience building and shipping production-ready features end-to-end. I am ISTQB Foundation Level certified and work confidently across React, TypeScript, Node.js, Express, REST APIs, and SQL databases, with deployments on Azure App Service and AWS. I am comfortable working in unfamiliar codebases, picking up new frameworks and tools quickly, and collaborating closely with cross-functional teams. I use modern AI development tools (Claude, Cursor, GitHub Copilot) in my daily workflow and have a solid understanding of LLM behaviour, token usage, and tool calling concepts. I am excited about the chance to contribute as a remote part-time Full Stack Developer at micro1.

Technical Skills

Frontend

- React.js, TypeScript, Next.js, Angular, WordPress, React Native
- JavaScript (ES6+), HTML5, CSS3, SCSS
- Bootstrap, Tailwind, AOS, Vite, GSAP

Backend and APIs

- Node.js, Express, C#/.NET, Python, Flask, PHP
- REST APIs, API Integrations, JSON, JWT auth, RBAC
- MySQL, PostgreSQL, SQLite, IndexedDB

Cloud, AI, and Tools

- Microsoft Azure (Fundamentals + AI Fundamentals certified), AWS (EB, RDS, Route 53, IAM)
- Docker, GitHub Actions, CI/CD, Postman, Jest, Playwright, ISTQB CTFL 4.0
- AI dev tools (Claude, Cursor, GitHub Copilot), Azure AI services, LLM token and tool calling awareness

Selected Achievements: Production-Ready Web Apps for Real Clients

- **Lodge Matariki 476 (Freemasons Lodge, Auckland):** SaaS-style membership portal with Admin, Member, and Visitor roles. Python, Flask, PostgreSQL, Docker, Bootstrap, Azure App Service, GitHub Actions CI/CD.
<https://lodgematariki476.co.nz/>
- **ShowerPower Ltd (NZ Trade Business):** Full-stack responsive commercial site with animated UI. React, TypeScript, Node, PostgreSQL, GSAP/AOS, Docker, CI/CD, Azure App Service, Azure PostgreSQL Flexible Server, SEO.
<https://www.showerpower.co.nz/>
- **FieldSafe (Conservation Volunteers NZ):** SaaS admin platform with offline access. Boosted operational efficiency by 60% through automated risk tracking, scheduling, reporting, and notifications. React Vite, TypeScript, Node.js, Express, MySQL, REST APIs, PWA with Service Worker, IndexedDB, AWS (EB, RDS, Route 53, IAM), CI/CD.
<https://fieldsafe.org.nz/>
- **Smart Panel Homes Ltd:** Increased customer engagement by 80% through performance optimisation, lazy loading, blur placeholders, code-splitting, and SEO improvements. React, PHP, Node.js, MySQL, Bootstrap, AOS.
<https://smartpanelhomes.co.nz/>
- **SAMCT (in progress):** Multi-role website and portal with public pages, resident maintenance access, and admin dashboards for South Auckland Masonic Charitable Trust. React, TS, C#, .NET, PostgreSQL, Docker, Bootstrap, AOS.
- **Senior Healthcare Auckland Ltd (in progress):** Full-stack healthcare services site with responsive animated pages, staff recruitment form, and client enquiry form. Next.js, C#, MySQL, Bootstrap, CSS3, AOS.

Professional Experience

Software Developer, AI Avaluator | micro1 /Alignerr

• May 2026 to Present

- Review AI-generated code and technical answers for correctness, logic, edge cases, and clarity.
- Check whether code solutions meet task requirements and follow clean coding practices.
- Provide structured feedback to improve AI reasoning, code quality, and technical accuracy.

Freelance Full Stack Developer | Independent, Auckland, NZ (remote) • Nov 2025 to Present

- Building production websites and SaaS portals for SAMCT (RBAC admin portal) and Senior Healthcare Auckland (Next.js healthcare site).
- Recently delivered Lodge Matariki 476 and ShowerPower Ltd commercial sites, deployed to Azure App Service with Docker and CI/CD via GitHub Actions.
- Integrating REST APIs and third-party services, building forms with email notifications, and managing PostgreSQL and MySQL data layers.
- Using Claude, Cursor, and GitHub Copilot to accelerate development across unfamiliar codebases.

Full Stack Developer | CVNZ, Auckland

• Nov 2024 – October 2025

Conservation Volunteers New Zealand (CVNZ), Auckland. Initial 3-month internship extended to fixed-term contract. Also delivered as Master of Applied Computing capstone, Lincoln University.

- Built and shipped FieldSafe end-to-end, a SaaS admin dashboard with React Vite, TypeScript, Node.js, Express, MySQL, REST APIs, and RBAC for permission-driven user management.
- Performed REST API testing using Postman for both manual validation and automated execution.
- Added offline PWA support using Service Worker, Web App Manifest, and IndexedDB for field use.
- Deployed to AWS (Elastic Beanstalk, RDS, Route 53, IAM) with SSL, configured Google Search Console, and managed CI/CD via GitHub Actions.
- Used MySQL Workbench, Jira (stories, AC, epics), and Excalidraw (wireframes) for stakeholder alignment.

Key Challenges and Solutions

- **Manual workload across volunteer coordination:** Built automated workflows for scheduling, reporting, and notifications, improving operational efficiency by 60 percent.
- **Debugging spread across modules:** Integrated Winston Logger for structured logging and centralised error tracking, cutting debugging time by 40 percent.
- **Changing requirements during development:** Refactored database schema and API endpoints to support a project-to-activity model without disrupting active users.

Full Stack Developer

• Nov 2023 to Aug 2024

Smart Panel Homes Ltd, Auckland

- Developed a responsive commercial site that increased customer engagement by 80 percent.
- Built front-end interfaces with React, JavaScript, Bootstrap, and CSS animations, and a Node.js plus MySQL backend with form integrations.
- Optimised performance through Vite, lazy loading, blur placeholders, and component code-splitting.
- Quickly learned PHP when hosting did not support Node.js, enabling form submission and email delivery without extra cost.

Key Challenges & Solutions:

- **Hosting plan didn't support Node.js:** learned PHP quickly to enable form submission & email delivery without extra cost
- **Bundle size too large:** resolved with Vite build optimisation, lazy loading, and blur placeholder technique

Software Development Bootcamp | Dev Academy Aotearoa (Enspiral), Auckland • Feb 2023 to May 2023

- Completed approximately 800 hours of full-stack JavaScript, MERN, Agile, and TDD practice.
- Acted as Git lead in group projects, managing branching strategies, pull requests, and conflict resolution.
- Applied Jest for unit testing, Playwright for end-to-end, and Postman or Insomnia for REST API validation.
- Built a music app in one day, leading front-end development and resolving a critical CSS naming bug.

A Challenge: Built a music app in one day, leading front-end development and Git-based collaboration. Resolved a critical CSS naming bug, showing strong attention to detail and problem-solving.

Freelance Web Developer, while studying part time, Various clients, NZ and Iran • Feb 2016 to Jan 2023

- Delivered client websites using HTML5, CSS3, animations, and vanilla JavaScript, progressing into React from 2021.
- Notable projects: Rastak Music Band site (NZ), Real Estate agency site (Iran) with search and filters, and Seed Company site (Iran) with product catalogue.
- Built foundational cloud skills, completing Microsoft Azure and AWS certifications during this period.

Computer Workshop Teacher and Supervisor

• Sep 2010 to Nov 2013

Technical and Vocational School, Iran

- Taught web development and programming fundamentals to students of mixed abilities.
- Established and ran two computer labs, increasing student access and improving programme outcomes by 60 percent.

Education and Certifications

- Master of Applied Computing, Lincoln University, New Zealand. 2024 to 2025.
- micro1 Certified Full Stack Developer (Apr 2026).
- ISTQB Certified Tester Foundation Level (CTFL 4.0), iSQL. Aug 2025.
- Microsoft Azure Fundamentals (Oct 2023) and Microsoft Azure AI Fundamentals (Sept 2024).
- Certificate Level 6: Applied Software Development, Dev Academy Aotearoa, Auckland. 2023.
- Certificate Level 4: Technology Product Development Essentials, Otago Polytechnic, Auckland. 2021.
- AWS badge, Amazon Web Services. Jun 2023.
- Bachelor of Arts: Theology, Ferdowsi University, Iran. 2016.
